CHAPTER 12 - OVERWORLD RULER VIII

*A trick on the eyes to prevent useless cards from disturbing
the story...*

*In the world for Alice,
anything that can harm her is unforgivable*

*So, I went into the rabbit hole
and got rid of most things*

But, there are cards I couldn't get rid of

The useless ones that are hanging too high

*And since they harmed Alice,
I turned them into ragdolls*

In other words, Alice wanted to go through that door, but because of Billikens, she ended up exiting through the rat hole. Right, shooting star.

What do you mean by 'For Alice'??

CE

A sewer rat is a huge rat that lives dependently on people. It lives near towns and lives in nearby sewers. It is also raised for baking or eating, but it also spreads pests (plagues) or Weil's disease.

Were you surprised because it was uploaded when it's not the day it's usually uploaded?

Now, **Mad March** begins!

During March, it **will be released** at irregular times, but it'll be released earlier than every other week! (During April, it will be changed back to release on every other week.)
